## MAINTENANCE AND CARE

### VARNISHED OAK

Our oak tables have a pigmented oil finish which forms a natural coating, repelling most common substances and fluids. Nevertheless, it's no foolproof guarantee against stains. We recommend removing any spilling immediately to prevent staining.

For daily care: Use a moist towel or sponge with a mild solution of water and natural, non-aggressive soap. Make sure your towel or sponge is not too wet!

For a quick facelift: When the wood starts to feel dry or is stained, we recommend using an oil or liquid wax cleaner for periodic maintenance of wooden floors. Do not use this product daily. Oil and liquid wax cleaner are no guarantee against stains, but they often do the trick and it surely doesn't hurt to try!

For stubborn stains & repairs: Through time and depending on wear, the original hardwax coating on the furniture may need to be renewed. Make sure the surface is clean and dry. Then sand the furniture using extra fine sand paper (minimum 320 grit) and work in the direction of the wood grain. Next, apply a new hardwax oil. These products can be purchased at a flooring specialist.

### POLYPROPYLENE ROPE

Another material used for our all-weather furniture, is rope. Our rope is made of polypropylene fibres or acrylic. Just like our other synthetic materials, the rope is designed to withstand any weather condition and can be left outside all year long.

For maintaining your rope furniture, we recommend using the fabric and upholstery protector to give optimal stain resistance.

To clean spots on the rope, we suggest applying a mist of soapy water with a spray bottle and then work the solution into the rope with a soft cloth by patting or rubbing lightly. Rinse the solution thoroughly and then blot excess moisture from the rope using a soft cloth and allow air-drying.

Never use a high-pressure hose on acrylic rope.
