### MAINTENANCE AND CARE

#### LLOYD LOOM

Both our indoor and outdoor Lloyd Loom furniture can easily be maintained with a moist towel and some natural, mild soap.

In order to be able to use Lloyd Loom for outside furniture as well, a specific technique was developed in order to make the material waterproof. Our outdoor Lloyd Loom models can thus simply be left outside, although we recommend storing them inside during cold or rainy periods.

#### STEEL

Steel is used in our indoor collection as well as our outdoor collection, mainly for the legs and frames of our furniture pieces.

For the outdoor pieces, the steel is always galvanized and powder coated to make sure it is protected from all-weather influences.

Clean your armour with a moist towel and some natural soap!

#### VARNISHED OAK

Our varnished tables are finished with a water-based lacquer for the protection of the wood and has an good chemical and mechanical resistance.

Regular cleaning with a mild solution of water and natural soap will do the trick!

Please do not sand varnished furniture, as this will damage the protective layer and will thus affect the water and dirt resistance of your furniture.
