TECHNICAL INFORMATION

CONSTRUCTION

Designed with meticulous attention to detail and completely handmade in Belgium, Ari boasts a beautiful finish that showcases the organic nature of its materials while ensuring quality. Each table is a work of art, as several layers of mineral plaster are carefully applied, making every Ari table truly one-of-a-kind.

To enhance its durability and protect against moisture, the Ari is finished with a water-repellent varnish. This practical feature not only maintains the table's pristine appearance but also makes it easy to clean and maintain.

Not only does the Ari Table captivate with its aesthetic appeal, but it also embodies the principles of sustainability and eco-friendliness. Made from lava, naturally colored rocks, sustainable raw materials, and hydrated lime, this table is crafted with environmentally-friendly practices. Additionally, it is CE - EN 13813 compliant, ensuring its quality and safety.

MAINTENANCE AND CARE

MINERAL PLASTER

Regular cleaning with a soft non-abrasive sponge or cloth and mild solution of water and natural soap will do the trick!

We highly recommend cleaning the table as soon as possible after spilling any fluids. This prevents the stains from penetrating and unnecessarily damaging the material.

Please do not use aggressive cleaning products such as Cilit bang, Antikal, vinegar and/or bleach. Do not use cleaning products with acids or lemon either.

We recommend feeding the surface on a regular basis. This can be done, for example, with: Marseille soaps, Triple effect spray or Anti-stain W from Akemi. These nourish the surface and ensure that you can continue to enjoy your table.

Please do not sand varnished furniture, as this will damage the protective layer and will thus affect the water and dirt resistance of your furniture.

Furthermore, there are a few things to keep in mind:

- Do not place candles directly on the tables, always use a holder or tray.
- Do not put hot pots and pans in direct contact with the surface, always use a coaster.
- Be careful with hard and sharp objects, never cut directly on the table.

The table legs are finished with a rubber or cork sole. The table should always be placed on a dry and grease-free surface. If in doubt, contact your flooring specialist. When cleaning your floor, make sure that no water and/or soap residue remains under the leg. This will prevent marks on your floor.

The Ari table is only suitable for indoor use and can under no circumstances be used outdoors.
