## **MAINTENANCE AND CARE**

### **CERAMIC**

If you're looking for a material which requires little to no maintenance, yet offers maximum resistance, you would do well to involve ceramic. The material preserves the natural look of stone and offers top of the chart convenience. Cleaning the table with water and mild soap will do the trick!

### **ALUMINIUM**

Aluminium has a self-protective layer, which prevents corrosion and makes this material very suitable for outdoor applications.

On top of that, it is super easy to maintain. A quick wash with a nonfoaming mild detergent every now and then is all it needs!
