## TECHNICAL INFORMATION

---

The Akari collection by Vincent Sheppard is characterized by its delicate and airy silhouette, fine lines and tactile twisted rope. The light-weight aluminum frame, finished in a dune white powder coating creates a light and elegant structure that enhances the spacious feel of any outdoor setting.

A standout feature is the use of flax twisted rope, which gives the collection a refined and contemporary aesthetic. Unlike braided ropes, the twisted rope used in Akari is more subtle and intricate, adding to the overall sense of lightness and sophistication.

The cushions contrast beautifully with the airy frame, offering a luxurious comfort that beckons relaxation. The soft, neutral tones of the fabric further emphasize the collection's understated elegance, while the use of 50% recycled yarn reflects Vincent Sheppard's commitment to sustainability.

## MAINTENANCE AND CARE

---

### POLYPROPYLENE ROPE

Our rope is made of polypropylene fibres. Just like our other synthetic materials, the rope is designed to withstand any weather condition and can be left outside all year long.

For maintaining your rope furniture, we recommend using the fabric and upholstery protector to give optimal stain resistance.

To clean spots on the rope, we suggest applying a mist of soapy water with a spray bottle and then work the solution into the rope with a soft cloth by patting or rubbing lightly. Rinse the solution thoroughly and then blot excess moisture from the rope using a soft cloth and allow air-drying.

Never use a high-pressure hose on rope.

### ALUMINIUM

Aluminium has a self-protective layer, which prevents corrosion and makes this material very suitable for outdoor applications.

On top of that, it is super easy to maintain. A quick wash with a nonfoaming mild detergent every now and then is all it needs!
